

Product Specification

800GBASE 2xDR4/DR8 OSFP 1310nm 500m
DOM Dual MPO-12/APC Optical Transceiver
Module

PN: OSFP-800G-2DR4

Features

- Hot Pluggable OSFP form factor
- Operating data rate 850Gbps
- Single +3.3V power supply
- Dual MPO-12 connector
- Max power dissipation <16.5W
- PIN receivers
- Built-in digital diagnostic function
- Commercial temperature range 0°C to 70°C

Compliance

- Compliant with OSFP MSA
- Compliant with CMIS 5.1
- RoHS

Applications

- 800G Ethernet
- Cloud Services
- Data Center Interconnect
- Data center Enterprise networking
- Switches with OSFP ports

Description

The OSFP-800G-2DR4 is a high-performance, cost-effective optical transceiver module designed for 800G Ethernet applications in data communication networks. Compliant with the OSFP Multi-Source Agreement (MSA), this module is optimized for deployment in switches, routers, and high-density data center environments, supporting optical links of up to 500 meters over multimode fiber. The OSFP-800G-2DR4 converts 8-channel electrical input signals (each operating at 106.25 Gb/s) into 8-channel parallel 106.25Gb/s optical signals using advanced PAM4 modulation technology. Conversely, on the receiver side, it translates 8-channel 106.25Gb/s optical inputs back into 8-channel electrical outputs, ensuring seamless bidirectional data transmission with an aggregate bandwidth of 800 Gbps.

Engineered for robustness, the module is built to withstand rigorous operating conditions, including extended temperature ranges, varying humidity levels, and electromagnetic interference (EMI), ensuring reliable performance in diverse network infrastructures. It integrates a two-wire serial interface (I2C) for comprehensive digital diagnostics, real-time monitoring, and configuration management, enabling simplified network maintenance and enhanced operational efficiency.

The OSFP-800G-2DR4 is ideal for next-generation data centers, cloud computing platforms, and high-performance computing (HPC) clusters that demand ultra-high bandwidth, low latency, and scalable connectivity solutions. Its compact OSFP form factor and compliance with industry standards ensure broad interoperability with existing and future network equipment.

Product performance Specifications

1、 Basic Product Characteristics

Parameter	Symbol	Min	Typ.	Max	Unit
Absolute Maximum Ratings					
Storage Temperature	T _s	-40	-	+85	°C
Supply Voltage	V _{CC}	-0.5	-	3.6	V
Relative Humidity	RH	5	-	95	%
Control Input Voltage	V _I	-0.3	-	V _{CC} +0.5	V
Operational Specifications					
Operating Case Temperature	T _C	0	-	70	°C
Power Supply Voltage	V _{CC}	3.135	3.3	3.465	V
Power Supply Current	I _{CC}			2730	mA
Power Consumption	P _{DISS}	-	-	16.5	W
Data Rate	DR	-	850	-	Gbps
Pre-FEC Bit Error Ratio			2.4x10 ⁻⁴		
Transmission Distance	-	0.5	-	500	m

2、Product Optical and Electrical Characteristics

Parameter	Symbol	Min	Typ.	Max	Unit	Note
Transceiver						
Modulation format		PAM4				
Center Wavelength	λ_C	1304.5	1311	1317.5	nm	
Side Mode Suppression Ratio	SMSR	30			dB	
Average Launch power, each lane	P_{AVG}	-2.9		4.0	dBm	1
Optical Power OMA, each Lane max	P_{OMA}	3.5			dBm	
Outer Optical Modulation Amplitude (OMA _{outer}), each Lane	TOMA	-0.8		4.2	dBm	
Transmitter and dispersion eye closure (TDECQ), each lane	TDECQ			3.4	dB	
Launch Power in OMA _{outer} minus TDECQ, each lane	TOMA-TDECQ	-2.2			dB	
Extinction ratio	ER	3.5			dB	
Transmitter transition time (max)				17	dBm	
Optical Return Loss Tolerance	ORLT			21.4	dB	
Average Launch Power of OFF Transmitter, each lane	TOFF			-15	dBm	
Transmitter Reflectance				-26		2
Differential pk-pk Input Voltage tolerance		900			mV	
Differential Termination Mismatch				10	%	
Eye height		15			mV	
Common-mode to differential-mode return loss		IEEE802.3ck Equation (120G-1)			dB	
Vertical eye closure				12	dB	
Effective return loss		8.5			dB	
Transition Time		8.5			ps	
AC common-mode output Voltage (RMS)				25	mV	
RIN _{21.4OMA} (max)	RIN			-136	dB/Hz	
Receiver						
Modulation format		PAM4				
Center Wavelength	λ_C	1304.5	1311	1317.5	nm	
Damage threshold		5			dBm	
Average receive power, each lane		-5.9		4	dBm	

Receive power, each lane (OMAouter)				4.2	dBm	
Receiver reflectance	RR			-26	dB	
Receiver sensitivity, each lane		Max(-3.9, SECQ - 5.9)			dBm	3
Stressed receiver sensitivity, each lane	SRS			-1.9	dBm	4
Differential data output swing				900	mVpp	
DC common-mode Voltage		-0.35		2.85	V	
Differential termination mismatch				10	%	
Stressed eye closure for PAM4 (SECQ), lane under test	SECQ	3.4			dB	
OMAouter of each aggressor lane		4.2			dB	
Common-mode to differential-mode return loss		IEEE802.3ck Equation (120G-1)				
Effective return loss		8.5			dB	
Single-ended voltage tolerance range		-0.4		3.3	ps	
AC common-mode RMS voltage tolerance (TP1a)		25			mV	

Note1: Average launch power, each lane (min) is informative and not the principal indicator of signal strength

Note2: Transmitter reflectance is defined looking into the transmitter

Note3: Receiver sensitivity (OMAouter), each lane (max) is informative and is defined for a transmitter with a value of SECQ up to 3.4 dB

Note4: Measured with conformance test signal at TP3 for the BER = 2.4×10^{-4}

Note1: Open-Drain with pull up resistor on Host.

Note2: See pin description for required circuit.

Monitoring Specification

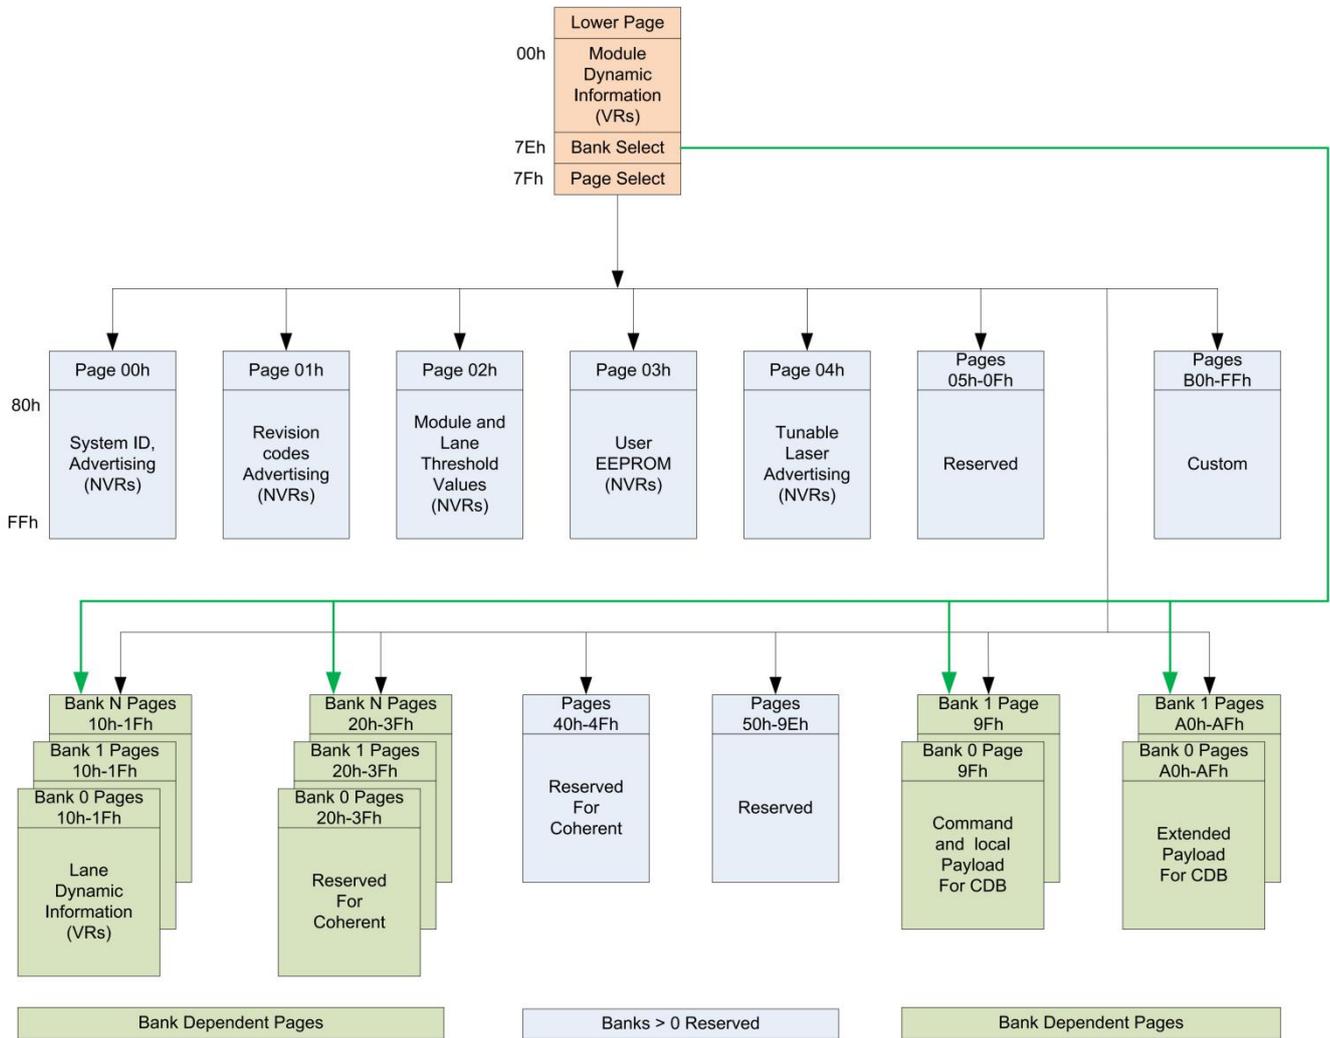

Figure5:Memory map

Memory map Table

Byte	Unit	Name	Description
Lower Page 00h			
0	1	Identifier	Identifier - Type of Serial Module - See SFF-8024.
1	1	Revision Compliance	Identifier – CMIS revision; the upper nibble is the whole number part and the lower nibble is the decimal part. Example: 01h indicates version 0.1, 21h indicates version 2.1.
2-3	2	ID and Status Area	Flat mem indication, CLEI present indicator, Maximum TWI speed, Current state of Module, Current state of the Interrupt signal.

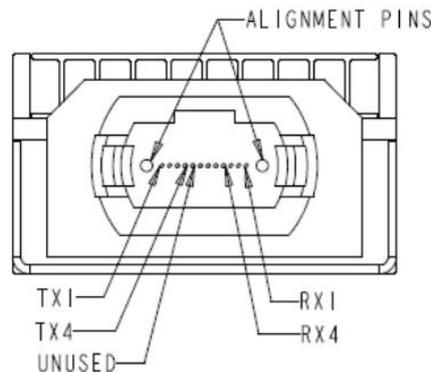

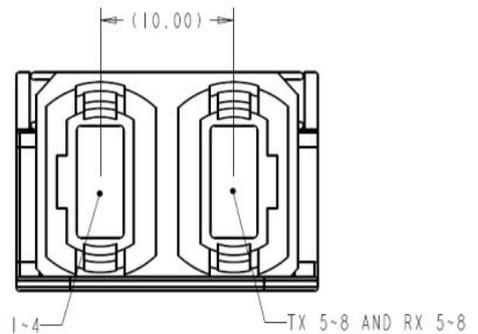

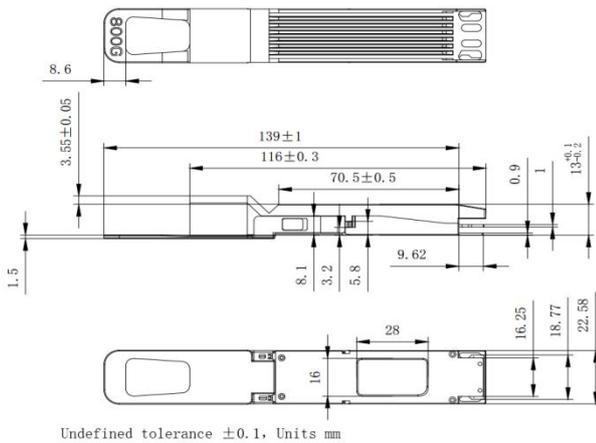

4-7	4	Lane Flag Summary	Flag summary of all lane flags on pages 10h-1Fh.
8-13	6	Module-Level Flags	All flags that are not lane or data path specific.
14-25	12	Module-Level Monitors	Monitors that are not lane or data path specific.
26-30	5	Module Global Controls	Controls applicable to the module as a whole
31-36	6	Module-Level Flag Masks	Masking bits for the Module-Level flags
37-38	2	CDB Status Area	Status of most recent CDB command
39-40	2	Module Firmware Version	Module Firmware Version.
41-63	23	Reserved Area	Reserved for future standardization
64-82	19	Custom Area	Vendor or module type specific use
83-84	2	Inactive Firmware Version	Version Number of Inactive Firmware. Values of 00h indicates module supports only a single image.
85-117	33	Application Advertising	Combinations of host and media interfaces that are supported by module data path(s)
118-125	8	Password Entry and Change	Password Entry and Change
126	1	Bank Select Byte	Bank address of currently visible Page
127	1	Page Select Byte	Page address of currently visible Page
Upper Page 00h			
128	1	Identifier	Identifier - Type of Serial Module - See SFF-8024.
129-144	16	Vendor name	Vendor name (ASCII)
145-147	2	Vendor OUI	Vendor IEEE company ID
148-163	16	Vendor PN	Part number provided by vendor (ASCII)
164-165	8	Vendor rev	Revision level for part number provided by vendor (ASCII)
166-181	10	Vendor SN	Vendor Serial Number (ASCII)
182-183	2	Date code year	ASCII code, two low order digits of year (00=2000)
184-185	2	Date code month	ASCII code digits of month (01=Jan through 12=Dec)
186-187	2	Date code day of month	ASCII code day of month (01-31)
188-189	2	Lot code	ASCII code, custom lot code, may be blank
190-199	10	CLEI code	Common Language Equipment Identification code
200-201	2	Module power characteristics	Module power characteristics
